*"Keep safety in mind as your constant companion..."*

August 27, 2012

**TO WHOM IT MAY CONCERN**

Mr. Deon van Dyk in his role as project manager of Sovereign International, a subcontractor to TMMC, has completed various grouting projects for TMCC in Canada during 2010, 2011 and 2012. TMCC is pleased with the results of his efforts. He demonstrated a high degree of knowledge in designing grout placement systems and also in how these systems would interact with the site geology.

We are especially pleased with the results he achieved at the DeBeers Snap Lake Mine in significantly reducing water inflow. His knowledge and abilities in solving complex water inflow problems in an underground environment is on a par, if indeed it does not exceed that of other hydrologists and grouting experts we have employed in the past.

Sincerely,

Rene Scheepers
