To Whom It May Concern:

Re: Sovereign Hydroseal Pty Ltd

Sovereign Hydroseal were introduced to CBH in September 2007 and have successfully completed over 50 jobs on 44 of our sites state wide.

These sites range from the Northern end of Western Australia's Wheat belt to the Southern Coast. The distance between these sites is approximately 1068 kilometres and suffers a range in temperature from + 45C to -4C.

To date we have never experienced any problems with Sovereigns NOH20 Grout, other products or their methods of application in these varying temperature ranges.

The work that Sovereign does for us can vary from underground tunnel, hopper and elevator pit sealing to above ground silo, building and V pit (truck unloading pit) sealing.

We have found that they are competent in both concrete and steel sealing applications.

We have been more than happy with the successful completion of each project and have been overwhelmed with the service provided by the Sovereign Group and Directors Deon Van Dyk and Nico Grobler with respect to their professionalism and attention to safety.

Yours Sincerely,

A handwritten signature in black ink, appearing to read 'Jock Carlson', is written over a light blue circular watermark.
